(54) Title: **ADHESIVE BRASSIERE AND ITS MANUFACTURING METHOD**

(57) Abstract: The object of the present invention is to provide an adhesive brassiere and a method of producing the same. The method includes molding a breast-like film made of thermoplastic polyurethane (TPU), placing the molded film in a mold for molding brassiere cups, pouring an adhesive silicone composition in the mold, and heating the adhesive silicone composition. The adhesive brassiere removably adheres to a breast without shoulder straps and wings, and a user can easily wear and remove it. Additionally, unlike a conventional adhesive brassiere, since a portion of the adhesive brassiere of the present invention, coming into contact with the breast, does not consist of a film structure but a bulk structure, its life is semi-permanent.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
